FORM
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

When I walked into my room; and
looked out of my window I saw a large
yellow light. Then it slowly started to
turn. Then a cloud came and the light
disappeared. Then I went outside and I
saw the light again, only it was round. Then
it started getting wider and there was
a tail on it. Then clouds covered it, and
where the light was the clouds were glowing
and the light went away.

This form was filled out from memory. But the events of that night were so impressive that I wrote out my impressions immediately and had my 8 yr. old daughter independently write hers as well.

These immediate impressions coupled with this form may be of some assistance in evaluation & are therefore enclosed with the report.

Approximately 9⁴⁵ to 9⁵⁰ - Kay noted a brilliant light in due West sky

Appeared somewhat over the surrounding
haze of a brilliant orange hue!
Went out back to glasses & observed
some for about 1/2 minute - seemed to
rotate in slow spiral downward &
then faded from view

Reappeared about 15-20 sec later much
lower in sky

Brilliant yellow & began to
elongate horizontally & seemed
to level off —

Shape  fluctuating
then contracted in size &
seemed to disappear behind
clouds but leaving the
margins of cloud brilliant
lighted — total time
elapsed some 4-5 minutes
Returned to house at 10⁰⁰ PM

Frightened —
Flaming Jet? seemed controlled
